Our vision

The Architecture Gate Est. seeks to have its name associated with elegance and beauty and to be a title of luxury. We also aspire to build a giant entity and play a leading role in the field of architecture and interior design services, and to be proactive in the field of innovation and artistic creativity.

Our message

To become a leading institution in the field of construction and building high-quality projects for the parties we work with and for the community in which we work and to provide integrated designs and innovative engineering solutions in the field of engineering and contracting.

www.architecturegate.com

Our Plan

We strive to utilize our capabilities to become the first choice for both our customers and employees by providing better opportunities for all, driven by our values, principles, and belief that we are an integral part of this society.

Our Values

- Upholding core values in our pursuit of excellence in our work.
- Building open relationships with our employees based on mutual trust, respect, and shared success.
- Distinguishing our service by meeting the expectations of the entities we work with and striving to achieve more.
- Our employees are our main asset, and we owe our successes to them.

architecture gate

About us.

Architecture Gate Est. is a multi-disciplinary general contracting institution that bases its success on a strong foundation of expertise, intellectual and creative capabilities, and a skilled workforce. With its team's proficiency and extensive experience in the Kingdom's markets, the company designs and executes all construction projects under the highest level of engineering supervision across all fields of construction. As the contracting sector in Saudi Arabia witnesses rapid growth and an increase in demand for specialized companies capable of implementing large projects, we stand out for our high professionalism and efficiency in execution. Our commitment to quality and attention to detail at all levels enables us to achieve advanced results consistently. Additionally, Architecture Gate Est. has gained extensive experience and a reputation for completing construction projects of a delicate nature, including electrical and mechanical works. As one of the leading Saudi institutions specialized in contracting work across various specializations, we adhere to our quality-driven approach, which has led to impressive successes, establishing our competitive position in the market as one of the most important pillars in the contracting sector in the Kingdom.

Our Team

The team at Architecture Gate consists of experienced and qualified designers who work collaboratively to create dynamic designs. We specialize in transforming empty spaces into modern and elegant designs with a sophisticated artistic touch. We strive to meet the needs of our clients and realize their vision through our creative and distinctive designs. If you are looking to add vibrancy and sophistication to your space, you have come to the right place!"

Headquarters design team

"The design team at Architecture Gate headquarters has extensive experience in design, regularly researching and learning design styles and concepts from various countries and regions. They always prioritize close attention and commitment to serving and meeting the needs of clients."

Implementation team

With over 10 years of experience, our execution team is fully knowledgeable in completing projects from receiving orders to delivery. We are experts in our specialized fields to meet the needs of our clients. The team comes together in a collaborative effort to provide an excellent experience for our clients, making the process seem effortless. This knowledge has been acquired with patience and maintained with enthusiasm as we continue to improve our systems and services."

Quality is our only choice

Quality has always been our objective in all administrative and executive processes, starting from management systems, research and development systems, finding creative solutions and ideas, executing projects of all kinds, the machinery and equipment we use, and even the programs dedicated to training and developing our team."

Attention to the smallest details

The attention to the smallest details is a fundamental means to achieve the quality we seek. Through our long experience, we have found that paying attention to small matters leads to great results, and this is the secret of our distinction.

Commitment is our responsibility towards our society

Our sense of responsibility towards our community arises from the fact that we are an inseparable part of its fabric. We are driven to be a part of its members' lives, to contribute to its development, and to take pride in fulfilling our role with competence.

Leaders in the contracting and construction sector.

Becoming a leader in a challenging sector like contracting is difficult, and survival in the face of intense competition requires excellence, extensive experience, high-quality work, and the latest technologies and machinery. Our long experience and high-quality work, combined with the use of the latest technologies, ensure our advanced leadership position. We have the ability to execute high-quality projects of any size, which has solidified our position as one of the important pillars of the contracting sector in the Kingdom.

Interior Design.

The Interior Design Department of the Architecture Gate Foundation is led by a highly qualified team that includes a distinguished elite of specialized engineers and professionals, and is supported by a huge group of technicians and workers. The institution has a good reputation as a highly efficient contracting institution, as the interior design team uses advanced programs specialized in design and engineering drawing to achieve the distinguished vision and provide innovative design ideas that meet the needs of customers and commensurate with their aspirations. Thus, the Gateway to Architecture Foundation is a research laboratory in the field of advanced applied arts

Construction Works.

The Corporation has an integrated staff of skilled workers led by a team of qualified engineers, which enables it to carry out all work related to construction projects, whether it is new buildings, restoration or road services. The department also creates structural designs for architectural plans, as it calculates the loads, reinforces the buildings, then calculates the quantities and costs, and among the list of civil works covered by the institution:

Infrastructure works

Our company offers multiple solutions to address all types of soil, such as excavation work, soil replacement, leveling new planning areas, water and sewage lines, road foundation works, rock cutting works, and backfilling works.

Building Works in General

We have expanded our field of work to include implementing high-quality construction projects. The work stages begin with conducting a feasibility study for the project and developing the initial design. This is followed by creating the detailed design and undertaking the construction process. The stage ends with post-construction contracting work, including maintenance and operation. This includes government buildings, villa complexes, palaces, health facilities, commercial buildings, industrial buildings, and educational institutions.

Electromechanical.

Electromechanical activities are among the main specialized services provided our Foundation. The electromechanical projects department of the institution undertakes the task of preparing designs and executive plans for electrical and mechanical works for all projects, as well as supervising their implementation and installation at the highest level of quality.

Landscaping

With the growing volume of our organization's work and the increase in public facilities, parks, and green spaces in the Kingdom of Saudi Arabia, and the need for specialists in this field, it became necessary for us to develop our team to include this expertise with professionalism. We have recruited a team of qualified professionals with diverse specializations in agriculture, site beautification, and irrigation systems, in order to take advantage of the latest technologies in this field. As a result, We have been able to successfully implement many high-end major projects in the field of afforestation and landscaping.
